HTML

CSS

JavaScript

Node JS

PROJECTS

Movie Hunter

- Movie Database that uses third party web APIs (IMDB API, MovieDB API) to allow users to search/browse for movies and be presented with details about the movie.
- Languages used: HTML, CSS (Bootstrap), Javascript (jQuery)

Weather Dashboard

- Interface that allows a user to search a city and view weather info about that city. Included in this weather info is temperature, wind speed, humidity and UV Index
- Languages used: HTML, CSS, Javascript

Code Quiz

- Coding quiz with multiple choice questions
- This quiz is timed, and the time left at the end of the questions is the players high score
- Players are deducted 10 points/seconds for wrong answers and not penalized for correct answers
- High scores are stored and displayed at the end of the game or upon user request.
- Languages used: HTML, CSS, Javascript
